

OSNCA Member Ride Dennis & Pat Flesher 67 Dodge

DART

My first new car was a '67 Dodge Coronet 500 hardtop. I loved that car. I decided to find a classic car, and last October this Dodge Dart 270 hardtop showed up on the Car Soup website in Texas. My brother-in-law Bob Andrews and I flew to San Antonio and drove the car back to Lake Havasu City.

We were on the road five hours when, at a gas stop, an offer was made for the car for an amount half again more than I paid for it.

It is a very clean driver that still has the original front license plate from 1967. With only minor issues to deal with, it will only get better. It has the 273 V8 and automatic trans, power steering and dual exhaust as well as a cold-blowing AC. The car is totally stock and I intend to keep it that way. This is my first collector car, and I'm having a ball.

I retired from 3M in Minnesota after 25 years as a Capital Equipment Designer in 2002, and Pat and I had our home built here, moving in on our 40th Anniversary, May 8, 2005.
